

HELP FOR LOGIN

To make the system user-friendly and for multi-stage data checking and validation, a 3-tier user login system has been provided:

Login type	Remarks
Project	Password required would be project code, the list of which has been provided to the subsidiary. This login can be used to enter the relevant data by different departments/ persons of the Project. However, filled-up data cannot be submitted using this login, it can only be submitted by using login of Project Officer.
Project Officer	First time password is same as that of last year and it is available with subsidiary HQ. However, the password should to be changed by the concerned Project Officer subsequently. Filled-up data can be submitted to subsidiary headquarter, using this login type only. Care may be taken to verify the data before submission to subsidiary HQ, as no editing would be possible by Project login or Project Officer login after submission. However, subsidiary HQ may revert back the submitted data to Project for correction/rectification and may reset the password for Project Officer
Subsidiary HQ	First time password would be the same as that of last year. However, the password should be changed by the subsidiary HQ subsequently. The submitted data from Projects can be viewed and downloaded using this login. Subsidiary HQ should check and validate the data before final submission to CMPDI. Once submitted to CMPDI, the data cannot be modified. In case of any discrepancy observed by subsidiary HQ during checking, the data may be reverted back to concerned Project for correction/rectification and resubmission.

For new departmental OC mines started during 2019-20 and outsourcing patches, a link for downloading blank MCA format in Excel has been provided under the subsidiary login. The same may be filled-in and sent through e-mail at gmoc.cmpdi@coalindia.in.

The soft copy of Workings Plan (in autocad/.dwg format) of all the mines containing the working details during 2019-20 such as working faces, transportation haul roads, coal & OB dumps with volume/quantity and RLs of entire working area etc. may be collected at subsidiary HQ and may be submitted through e-mail at gmoc.cmpdi@coalindia.in along with submission of online-data by subsidiary HQ. In case if soft copy of Plan is not available for any mine, the hard copy of the same may be submitted *through* subsidiary HQ.
